

EPOXY HARDENER D2735

Description:

D2735 is a low-viscosity, solvent-free, hybrid-modified cycloaliphatic amine curing agent. It features a light color, good resistance to yellowing, long working time, excellent adhesion, and anti-corrosion properties, making it suitable for protective coatings on substrates like metal.

Applications:

- Solvent-free and high solid content anti-corrosion coatings
- Coatings for pipelines, ships, etc.
- Adhesive materials

Characteristics and Advantages:

- Solvent-free with high solid content
- Light color with a long working time
- Excellent mechanical performance and anti-corrosion properties
- Light color with stable quality
- The addition of accelerators can increase curing speed

Specification:

Indicator	Value
Viscosity(cps/25°C)	100-400
Amine Value (mg KOH/g)	270-310
Color	white to light yellow
AHEW (g/mol)	98
Solid content(%)	100
Ratio (PHP, EEW=190)	100:50

Package and storage:

- Sealed in 200 kg iron drums.
- Store in a cool, dry place;
- Avoid contact with strong oxidizing agents;
- Keep away from fire and heat sources.
- Ensure the container is sealed.
- During transportation, protect from rain, sun exposure, and prevent damage to the packaging or moisture ingress.
