

EPOXY HARDENER D3014

Description:

D3014 is a solvent-based low molecular weight pure polyamide epoxy curing agent.

Applications:

- Anti-corrosion primers, intermediate, and top coatings
- Flooring System

Characteristics and Advantages:

- Excellent anti-corrosion properties
- Fast curing speed, with low risk of yellowing
- Superior mechanical properties

Specification:

Indicator	Value
Viscosity(cps/25°C)	6,000-10,000
Amine Value (mg KOH/g)	180-220
Color	yellow transparent liquid
AHEW (g/mol)	180
Ratio (PHP, EEW=190)	100:92

Package and storage:

- 180 kg sealed containers.
- Store it in cool, dry conditions,
- Avoiding contact with strong oxidizing agents.
- Keep it away from fire and heat sources, and ensure the container remains sealed.
- During transportation, protect it from rain, sunlight, and prevent damage or moisture to the packaging.
