

EPOXY HARDENER D3014B

Description:

D3140B is a low viscosity, pure solid polyamide curing agent that can be used with solid or liquid epoxy resin at room temperature. It is recommended for use in solvent-based anti-corrosion, solvent-free adhesives, flooring and other fields.

Applications:

- Anti-corrosion coatings
- Flooring coatings
- Epoxy adhesive

Characteristics and Advantages:

- Excellent anti-corrosion properties;
- Excellent mechanical properties;
- Not easy to yellow;
- High solid content, high cost performance;

Specification:

Indicator	Value
Viscosity(cps/40°C)	3000-8000
Amine Value (mg KOH/g)	320-360
Color	≤ 13
AHEW (g/mol)	100
Ratio (PHP, EEW=190)	100:50

Package and storage:

- 200 kg sealed package.
- Store in a cool and dry place;
- Avoid contact with strong oxidants;
- Keep away from fire and heat sources;
- Keep the container sealed.
- Protect from rain and sun during transportation,
- Prevent the package from damage and moisture.
