EPOXY HARDENER D3015A

KENVEI CHEMICAL

Description:

D3015A is a cashew phenol-modified amine curing agent. It offers a faster drying and curing speed compared to conventional epoxy curing agents, even in normal and low-temperature environments. It maintains good curing performance at temperatures as low as 0°C.

Applications:

- Solvent-based and high solid content anti-corrosion coatings
- Flooring coatings
- Adhesive materials

Characteristics and Advantages:

- Wide versatility with fast curing speed
- High cost-effectiveness
- Excellent mechanical properties
- Stable quality
- The addition of accelerators can increase curing speed

Specification:

Indicator	Value
Viscosity(cps/25°C)	6,000-11,000
Amine Value (mg KOH/g)	170-210
Color	Brownish red transpanrent
AHEW (g/mol)	150
Ratio (PHP, EEW=190)	100:100
Solid Content(%))	100

Package and storage:

- Sealed in 200 kg iron drums.
- Store in a cool, dry place; avoid contact with strong oxidizing agents;
- Keep away from fire and heat sources.
- Ensure the container is sealed.
- During transportation, protect from rain, sun exposure, and prevent damage to the packaging or moisture ingress.

Address: High-Tech Zone, Shijiazhuang City, Hebei Province, China Phone/WhatsApp: +86-13393315821 Email: info@kenvei.com
