

EPOXY HARDENER D3033

Description:

D3033 is a low-viscosity, solvent-free modified amine epoxy curing agent. It is used at room temperature with liquid epoxy resin (EEW = 190) and is recommended for use in colored sand flooring coatings.

Applications:

- Colored sand flooring coatings;
- Adhesives;
- Potting materials.

Characteristics and Advantage:

- Excellent yellowing resistance, providing a good surface finish for colored sand;
- High cost performance;
- Light color and stable quality.

Specification:

Indicator	Value
Viscosity(cps/25°C)	100-300
Amine Value (mg KOH/g)	280-320
Color	≤ 1
Solid content (%)	100
AHEW(mg KOH/g)	98
Ratio (PHP, EEW=190)	100:50

Package and storage:

- Sealed packaging in 200 kg iron drums.
- Store in a cool, dry place;
- Avoid contact with strong oxidizing agents;
- Keep away from fire and heat sources;
- Ensure the container remains sealed.
- During transportation, protect from rain and sunlight, and prevent packaging damage or moisture exposure.
