EPOXY HARDENER D6280A

KENVEI CHEMICAL

Description:

D6280A is a low viscosity mixed modified alicyclic amine adduct, designed for use with liquid epoxy resin. It has excellent chemical resistance, water stain resistance and good surface effect. It is suitable for spring, summer, autumn and winter.

Applications:

- Solvent-free and high-solid anti-corrosion coatings;
- Chemical-resistant epoxy floor coatings;
- Adhesive materials

Characteristics and Advantages:

- Excellent chemical resistance;
- Good surface effect;
- Excellent mechanical properties;
- Light color and stable quality;
- Appropriate amount of accelerator can be added to increase the curing speed;

Specification:

Indicator	Value
Viscosity(cps/25°C)	400-900
Amine Value (mg KOH/g)	210±20
Color	≤ 8
AHEW (g/mol)	110
Solid content(%)	100
Ratio (PHP, EEW=190)	100:55

Package and storage:

- 200 kg iron drum sealed.
- Store in a cool and dry place;
- Avoid contact with strong oxidants;
- Keep away from fire and heat sources;
- Keep the container sealed.
- Protect from rain and sun during transportation, and prevent the package from damage and moisture.
