

## EPOXY HARDENER D8115-2

### Description:

D8115-2 is a high viscosity, low free amine, pure solid polyamide curing agent that can be cured with epoxy resin at room temperature and is recommended for use in coatings and adhesives.

### Applications:

- Anti-corrosion coatings
- Flooring coatings
- Epoxy adhesive

### Characteristics and Advantages:

- Excellent corrosion resistance;
- Longer application period;
- Excellent mechanical properties;
- High solid content, low free amine;

### Specification:

Indicator	Value
Viscosity(cps/25°C)	60,000-120,000
Amine Value (mg KOH/g)	200-240
Color	≤ 12
AHEW ( g/mol )	180
Ratio (PHP, EEW=190)	100:100

### Package and storage:

- 190 kg sealed package.
- Store in a cool and dry place;
- Avoid contact with strong oxidants;
- Keep away from fire and heat sources; keep the container sealed.
- Protect from rain and sun during transportation,
- Prevent the package from damage and moisture.
