

EPOXY HARDENER D9060

Description:

D9060 is a low viscosity, solvent-free, modified alicyclic amine epoxy curing agent. Its outstanding features are high solid content and low viscosity, excellent mechanical properties and corrosion resistance; it is combined with liquid epoxy resin (EEW=190) at room temperature and is recommended for use in solvent-free or high solid coatings.

Applications:

- -Solvent-free and high-solid anti-corrosion coatings;
- -Floor coatings;
- -Adhesive materials

Characteristics and Advantages:

- -Can be used as water-resistant coating, colorless and transparent, not easy to yellow;
- -Good mechanical properties;
- -Good chemical resistance and corrosion resistance;
- -Light color and stable quality;
- -Adequate amount of accelerator can be added to increase the curing speed;

Specification:

Indicator	Value
Viscosity(cps/25°C)	300-500
Amine Value (mg KOH/g)	250-290
Color	colorless transparent liquid
AHEW (g/mol)	114
Solid content(%)	100
Ratio (PHP, EEW=190)	100:50-60

Package and storage:

- 200 kg iron drum sealed.
- Store in a cool and dry place;
- Avoid contact with strong oxidants;
- Keep away from fire and heat sources;
- Keep the container sealed.
- Protect from rain and sun during transportation, and prevent the package from damage and moisture.
